- > *Suitable for interior and exterior use*
- > *Available with or without handrail*

PURE PARTITION
Layout example

Pure – the elegant partition

■ **Glass partitions are becoming more and more popular** because transparency creates trust. When used as a guidance system, they ensure both safe customer guidance and a bright, open ambience. Our Pure partition is elegant, unobtrusive and can be used for both interior and exterior applications. The Wanzl installation team will install the partitions.

Note: the Pure partition may not be used as fall protection on parapets.

Floor profile components

Made of aluminium with stainless steel effect

Floor profile	90° edge	End cap
		
Lengths: 500 / 1,000 / 2,000 mm (19.7 / 39.4 / 78.7 in) Height: 115 mm (4.5 in)	Length: 230 mm (9.1 in) Width: 230 mm (9.1 in) Height: 115 mm (4.5 in)	for floor profile

Glass walls

Made of single-pane safety glass, polished edges (KPO).

Glass element

Length: 500 / 1,000 mm (19.7 / 39.4 in) Height: 1,000 / 1,200 / 1,400 mm (39.4 / 47.2 / 55.1 in) Glass thickness: 12 mm (0.48 in)

Rubber and wedge set

The glass is clamped. Drilling is not required.

Rubber set

Inner rubber profile, outer rubber profile, wedges and insertion angle

Optional: components for glass strip handrail and glass edge protection

Made of aluminium with stainless steel effect

Glass strip tube	90° connector	End cap	Glass edge protector
			
Lengths: 500 / 1,000 / 2,000 mm (19.7 / 39.4 / 78.7 in) Height: 40 mm (1.6 in)	L = 500 mm (19.7 in) W = 500 mm (19.7 in) H = 40 mm (1.6 in)	For glass strip tube Width: 40 mm (1.6 in) Height: 40 mm (1.6 in)	Length: 5,000 mm (19.7 in) Height: 5 mm (19.7 in) Affixed with double-sided adhesive tape
