First Class Travel Service

Experience since the early '70s

WANZL LUGGAGE TROLLEYS

Model for Deutsche Bundesbahn

■ At Wanzl, we know what people will want tomorrow.

As a world market leader for shopping trolleys, we provide exactly the right answers when it comes to transporting luggage at airports, seaports, railway stations and hotels too.

In the fast-paced world of international travel, passengers expect things to run quickly, smoothly and simply. That's precisely why many of the world's biggest airports now rely on the first-class equipment provided by world market leader Wanzl.

■ We have been providing luggage trolleys for more than 40 years.

The Wanzl luggage trolley, a robust and extremely sturdy trolley for the railway stations of today, has been tried and tested for many years and has also defied extreme weather conditions. This forefather product's genetic legacy can be seen in today's modern trolley used in airports, seaports, railway stations and hotels.

■ **Today, Wanzl employs** more than 4,200 people at 11 production sites worldwide. The company's portfolio has been continually expanded and adapted in line with current requirements. A luggage trolley for an individual customer is just as important as trolley management. Wanzl assists passengers and staff in all areas – in service, safety and sales.

TYPE 3 LUGGAGE TROLLEY

Ground-breaking in the '90s

TRAVELLER 2/B

End of the '90s

VOYAGER 2000

First aluminium luggage trolley in large series production

*The world is changing.
Take advantage of it!*

■ **Wanzl products are unique.** Wanzl's specialist competence, consistency, reliability and innovative solutions and technologies ensure effective work processes. In addition to our luggage trolley systems, which are used and trusted the world over, we also offer a variety of customer-specific solutions to ensure complete passenger satisfaction.

AERA 300 L

Modern and attractive

Quality_MADE BY WANZL

Wanzl sets standards for quality and design

IN-HOUSE CAD DEVELOPMENT

CONSIDERABLE MANUFACTURING DEPTH

EXCELLENT PRODUCT SYSTEMS

■ The range of Wanzl luggage trolleys, trolley management systems, porter trolleys, turnstiles, entrance and exit systems and service products is always expanding. But all the models and systems have one thing in common – a name that guarantees safety and quality: Wanzl.

■ Planning is supported by Wanzl's experience and know-how. During production, Wanzl can rely on high-quality materials, perfect processing and considerable manufacturing depth in-house. This enables us to always meet our own high expectations for product quality, short delivery times and delivery readiness.

■ Our high quality standards ensure long-term, virtually maintenance-free use and investment security. Modern test methods ensure fault-free functionality and durability.

Wanzl guarantees

■ **In addition to the statutory warranty,** Wanzl offers a reliable and flexible network of qualified service engineers who will be only too willing to help you if required.

Luggage Trolleys

The right trolley for your passengers

LUGGAGE TROLLEYS – LANDSIDE

LUGGAGE TROLLEYS FOR ESCALATORS

LUGGAGE TROLLEYS – AIRSIDE

■ **Luggage trolleys** for different requirements: Landside trolleys can transport large items of luggage long distances without any problems. They are easy to push even when heavily loaded and are also available in designs suitable for escalators if these are required due to the facilities at an airport. Airside trolleys are used to transport hand luggage or duty-free purchases.

■ **The high-quality craftsmanship** in all Wanzl luggage trolleys is synonymous with our company. Our high-quality products also continue to function perfectly for years. We guarantee to provide Wanzl original spare parts quickly in the long term via our after-sales service.

Wanzl stands for:

■ **A high level of safety during handling.** Where it is necessary to heed restrictions on use or safety regulations, symbols indicate the correct procedure to be followed.

Trolley Management

Innovative investments that pay off

VENDING SOLUTIONS

TROLLEY MANAGEMENT

TROLLEY MAINTENANCE

■ **The constant availability of** Wanzl luggage trolleys when required is essential for perfect trolley management. The well-organised supply of trolleys, the recirculation of trolleys via Wanzl collection points and the safe return of whole rows of trolleys to collection points using Wanzl airport scooters ensure that work processes are carried out efficiently.

■ **Maintenance** for luggage trolleys and related equipment, so that everything functions perfectly. Wanzl supplies the required original spare parts to replace wear parts. The latest software and modern RFID technology make maintenance child's play and you can keep track of costs.

Wanzl provides:

■ **Safety in processes** with optimum system availability. This increases the level of passenger satisfaction considerably.

Airport Cart Service (ACS)

Services that we are happy to take over for you

TROLLEY MANAGEMENT CONCESSION

PASSENGER ASSISTANCE

PORTER SERVICE

■ **Services connected with luggage trolleys and related equipment.** ACS takes over the whole range of services under concession including supplying ultra-modern luggage trolleys and innovative systems. All luggage trolley logistics, including cash management, staffing and continuous technical support, are then the responsibility of ACS Airport Cart Service GmbH.

■ **Services for passengers.** ACS also offers other services on request. Passenger Assistance is a friendly, effective and above all professional service for persons with reduced mobility or children travelling alone, and for providing support with regard to using machines, valet parking or the porter service.

ACS acts for you.

■ ACS Airport Cart Service GmbH will look after all the needs and requirements of your passengers, leaving you to concentrate on your key tasks.

Security Solutions

Electronic guidance, monitoring and ticketing systems

ENTRANCE & EXIT SYSTEMS

ACCESS CONTROL SYSTEMS

PAID ACCESS SOLUTIONS

■ **Access authorisation and control** in various areas with different requirements – personnel access, boarding systems, ticketing systems for chargeable areas and more. Adaptable systems with readers, scanners or vending machines have been reliably used for many years.

■ **Reliable separation, simple processes and exemplary service** are the objectives aimed for during the development of such systems. The introduction of chargeable areas has created the opportunity to generate increased revenue. Wanzl would be pleased to provide you with sample calculations for these.

Wanzl brings economic benefits

■ **It is important for investments to pay off quickly.** Today, modern technology automatically supports or takes over activities and functions in many areas. Entrances are monitored without personnel, monitoring systems accept barcodes and cashing up is carried out reliably in chargeable areas before or after use.

Wanzl Quality Highlights

Premium quality down to the finest detail

Materials and quality surfaces

- Wanzl uses only superior materials such as high-quality thick tubing
- Top-quality processing in-house and surface coating
- UV-resistant plastics for proprietary highly impact-resistant plastic parts

Extremely long product life spans – resulting in very low maintenance and repair costs (total cost of ownership).

High corrosion resistance due to multi-layered, extremely resistant surface coating.

EXEMPLARY FINISHES

Zinc and transparent powder layer

Zinc and transparent dip coating

Anti-bacterial handles

All coloured plastic powder-coated Wanzl handles have anti-bacterial powder coatings to maintain hygiene.

Quality brake system

- Perfect braking due to metallic brake shoe on the natural rubber surface of the castor
- Minimal wear as braking only occurs on the sides of the castor with no effect on the tread
- Brake adjusts itself to ensure a consistent braking force

Wanzl bonded-on quality castors

- Three-year warranty
- Natural rubber tread
- Minimal wear
- Non-chalking (leaves no residue)
- Double-sealed industrial ball bearing

01.03 Travel 300 BL

The premium model

- › Automatic braking upon nesting
- › Quick and safe manoeuvring of trolley clusters by service personnel
- › High-quality workmanship with well-thought-out details

TRAVEL 300 BL

Landside luggage trolleys

Pat. pend.

01.03 Travel 300 BL

■ **Premium technology packed into a timeless premium model.** The Travel 300 BL sets itself apart with its well-thought-out details: high-quality workmanship, automatic braking upon nesting, castors in direct contact with the ground and much more besides. The result: satisfied passengers and a quick and secure way for service staff to move multiple nested trolleys.

Minimal turning circle

Extended stacking shoe guarantees a smaller turning circle.

Airport Scooter

Nested trolleys are easily pulled along by the Airport Scooter.

Safety

Operating instructions are on the handle and on the inside of the generous hand luggage basket.

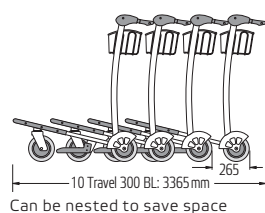

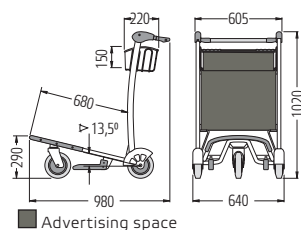

Anti-bacterial

Wanzl handles have anti-bacterial coloured plastic powder coating to maintain hygiene.

01.05 Travel 400/400 EX

The classic from Wanzl

- › Automatic braking upon nesting
- › Four-caster design
- › Spacious luggage platform

TRAVEL 400

Landside luggage trolleys

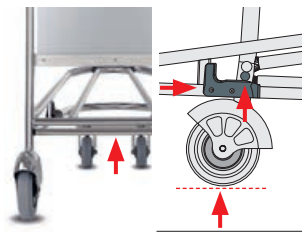

01.05 Travel 400/400 EX

■ The four-castor design that has been tried and tested all over the world.

The Travel 400 series shows why: the robust, durable design with generous luggage platform and extreme stability when heavily loaded make this the perfect trolley, especially under extreme conditions.

Low wear

Minimal wear on castors when pushing or pulling nested trolleys, due to the brake release feature.

Folding bracket

Optional additional luggage restraint.

Optional

Version with three castors: Travel 400/3 and 400/3 EX with one swivel castor Ø 180 mm at the front.

Anti-bacterial

Wanzl handles have anti-bacterial coloured plastic powder coating to maintain hygiene.

- › *Trolleys can be provided in one or several rows*
- › *Versatile payment options and use as a coin deposit system*

VENDING UNIT NG

Pat. pend.

ETISS Software & Service

The "ETISS" application (electronic secure transaction infrastructure software and services) manages vending ticket machines. The layout of the intelligent screen elements can be fully adapted to the corporate design of your company. Data is transferred between the machine and the application exclusively in encoded form. The incorporated security

options enable a direct connection from the ticketing system to the Internet and so offer flexible management of components. Remote maintenance, central software distribution and an adapted alarm system are also included in the delivery of the software.

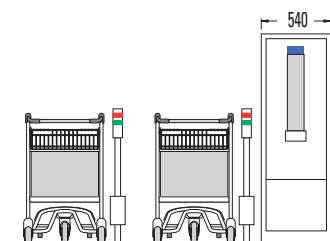

03.01 Vending Unit NG

■ **Coin acceptance with automatic sorting**, integrated alarm system, mechanical cash container locking, anti-theft multiple locking, graphics-enabled ticket/receipt printer and LAN interface for data exchange make the NG vending unit truly versatile.

Trolley guide made of aluminium profile

Rail profile and trolley adapter ensure reliable trolley guidance. Multiple tracks can be controlled with one unit.

Trolley adapter

Narrow plastic adapter in sturdy design with guide rollers.

Highlight

Illuminated signage for better visibility (optional, in the customer's own design).

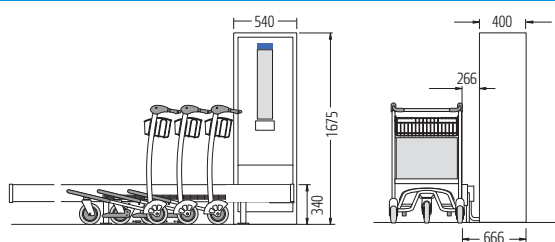

7" Touch Screen

Operation is both easy and intuitive via the integrated touch display.

03.02 Change Dispenser

The sturdy change dispenser

- > Reinforced locking mechanism
- > New safety devices against breaking open and drilling out
- > ccTalk protocol

CHANGE DISPENSER

■ The change dispenser is available in two different designs. The coloured plastic powder-coated steel housing is easily wall-mounted or used as a standing unit with base. The change dispenser recognises up to five bank-notes in a currency and converts these into coins in the same currency. The procedure is shown on a display. The housing offers space for two coin hoppers. These can be expanded if necessary, if a higher coin capacity is needed.

03.03 Maintenance & Inventory

Detailed maintenance check with RFID

- › Full documentation of service tasks that have been performed
- › Evaluation of service costs for specific periods
- › Overview of available trolleys

MAINTENANCE
SOFTWARE

■ **Regular maintenance checks increase the cost-effectiveness of luggage** transport trolleys. Each trolley is identified with a passive transponder and all maintenance work is analysed in detail.

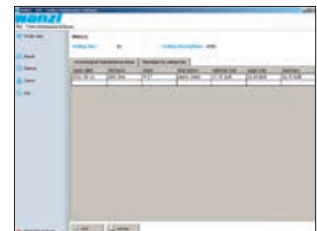

Transponder

Luggage trolley identification via the transponder built into the handle cap.

Trolley history I

The workshop visits of each individual trolley and the costs incurred are recorded chronologically in the database.

Trolley history II

List and overview of all defects that have occurred in accordance with defined categories, and frequency with overview of costs.

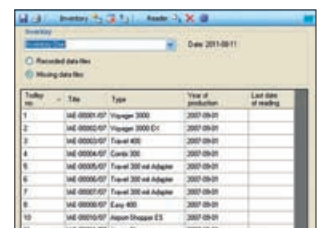

New visit to workshop

Documentation of the maintenance work performed. Recording of staff and material costs.

Trolley inventory

Displays all recorded luggage trolleys fitted with transponders.

03.06 Guide Rails

Modular system for luggage trolley collection points

- › *High-gloss stainless steel electro-polished finish*
- › *Can be extended to any length*
- › *Extensive advertising options*

GUIDE RAILS

03.06 Guide Rails

■ Sturdily constructed from stainless steel

and suitable for interior or exterior use, these guide rails ensure that luggage trolleys are compactly stored and ready for use. The system can be adapted in length to match customer specifications and can be installed in single or multiple rows.

Coin deposit system

Different coin deposit systems can be fitted to suit the type of trolley.

Acrylic glass

Optionally available with dimensions of 1,378 x 638 mm or 678 x 638 mm.

High quality

The guide rails are made from high-quality stainless steel tubing. Lateral trolley guidance provided by hard-wearing plastic profile.

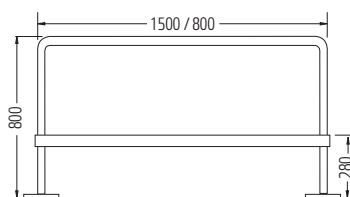

Advertising panels

Adhesive advertising panels are optionally available with dimensions of 1,378 x 638 mm or 678 x 638 mm.
