Wanzl: At home with housekeeping

■ **With its broad product portfolio, Wanzl** is now a key part of equipment landscape in the international hotel industry. The success story began with the Mundus housekeeping trolley. Today, the Tantum and Basic models complement the sustainable and high-quality range of housekeeping equipment. As a result, there is always the ideal model for every area and budget.

Renowned for its exceptional variability, the popular Mundus model offers almost endless possibilities for individual configuration. It also allows for flexible use of the trolley in different hotel areas, such as public areas or the hotel terrace.

The Tantum model impresses with its variable, adjustable wire shelves and robust design, while the Basic model impresses with its sturdy steel tube structure. Both models are just as durable as any other Wanzl product, despite the low level of investment required.
