

# The Logistics + Industry division

■ **Logistics always runs smoothly with Wanzl:** our range for order picking, transportation and warehousing supports internal and external logistics processes and contributes to reductions in error rates and lead times. Our order picking and transport trolleys, roll cages and mobile workstations are in use from the receipt of goods to the dispatch area.

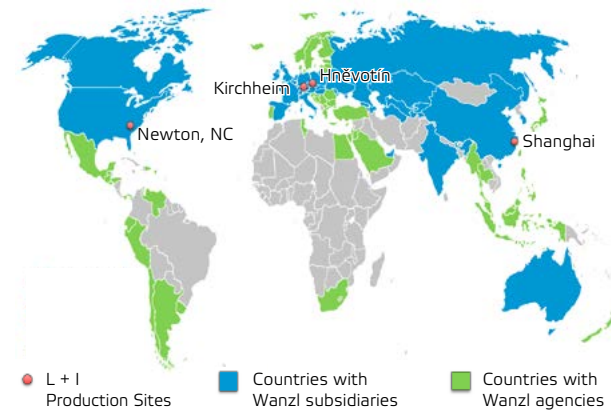

## Who we are

■ **Wanzl is the largest manufacturer** of shopping trolleys and luggage trolleys around the world and offers over 100,000 products, solutions and innovations for the divisions of Retail Systems, Shop Solutions, Logistics + Industry, Airport + Access Solutions and Hotel Service. Wanzl is an owner-managed, family company in its third generation with over 5,000 employees across global production sites and sales outlets.

# Top quality

■ Only the best quality manufacturers are chosen to supply an annual quantity of 80,000 tonnes of steel processed a year. Only these materials comply with the requirements for surface quality, strength, weldability and bending properties.

## Customised solutions

■ Some customer requirements demand an individual product design tailored to the specific task. Wanzl, with its high level of consulting expertise, offers the possibility of designing very specific product solutions and constructing them for you.

# Our product range

■ As a supplier of large and small order picking trolleys, mobile containers and transport trolleys, we have already set the logistics of numerous distribution centres for production and trade in motion.

## Order picking trolleys

Individual design

## Roll cages

Available in numerous models

From multi-channel distributors to large online retailers: we manufacture our products tailored to the respective logistics concept. And if it needs to be a little more, we also deliver large quantities in a short time.

## Package roll containers

In open or closed design

## Transport trolleys

For pallets and boxes in the tugger train

## Table trolleys

Mobile workstation

## Pallet systems

Pallet containers

Pallet boxes

# Dynamic Material Handling

■ The basic principle of Dynamic Material Handling is customised optimisation. Here, we look at the overall logistics concept of our customers on-site, analyse complex processes and make the right product selection together. There is no need to completely convert existing systems, since it can be retrofitted in increments.

## Autonomous transport robot

■ The MiRHook200 transport robot uses a gripper arm to pull the order picking trolley to the preprogrammed location, manoeuvring safely around people and obstacles.

## ProGlove MARK 2

■ The smart wearable bar code scanner replaces the traditional pistol scanner and allows warehouse personnel to work faster, more safely and more ergonomically. The scanning function is triggered by pressing a textile trigger in the cuff.
