RETHINK FULFILLMENT

PRODUCT HIGHLIGHTS

RETHINK FULFILLMENT

Wanzl gets everyday logistics processes moving

– with sustainable ideas to solve genuine challenges

From picking orders and transporting food to handling Euro boxes: There is seemingly no end to the obstacles that arise during our customers' daily routines. Wanzl addresses these challenges with well-thought-out products that simplify processes, conserve resources, and open up new possibilities. Our product highlights for the fulfilment sector are more than just handy helpers – they are genuine opportunities to increase efficiency, sustainability, and flexibility.

Sustainability is more than just a trend for Wanzl – it is part of our corporate identity. This is confirmed by the EcoVadis silver medal award, which places us in the top 15% of globally rated companies.

With 74 out of 100 points, we are even in the top 9%. These achievements send a clear signal of our responsibility towards present and future generations.

1. SUSTAINABLE MULTI-USE SOLUTIONS

| Taking responsibility.
Every single day.

Multi-use instead of disposable – this is the key principle of resource-saving logistics. Wanzl develops solutions that reduce packaging waste, close loops and minimise your ecological footprint. Our products combine functionality with responsibility – for logistics that stands the test of time, today and tomorrow.

Thermo Trolley

Transport refrigerated goods safely and economically

A partnership with
va-Q-tec

- **A closed cooling chain without additional refrigeration technology**

Transport frozen or chilled food for up to 12 hours without any dry ice or liquid nitrogen.

- **Efficient use of loading space**

Can be combined with other goods on one loading area – this saves vehicles, energy, and transport costs.

- **Sustainably insulated**

Modern vacuum insulation panels ensure consistently high thermal performance – and allow for mono-material sorting at the end of the product life cycle.

SYSTEM PALLET FOR EURO STANDARD BOXES

Efficient, clean, sustainable

- **Higher transport efficiency**

33 pallets per truck – despite a multi-tier structure with flexibly adjustable shelves for Euro standard boxes. This saves freight costs and reduces CO₂ emissions.

- **Available with a pallet made from recycled plastic on request**

Durable, moisture-resistant and resource-efficient.

- **Sustainably recyclable**

Both the metal structure and the plastic pallet can be recycled at the end of their life cycle.

Dimensions L x W x H

Shelf area: 1,200 x 800 mm

Total height incl. pallet: 2,022 mm

RC/N9 SERIES ROLL CAGE

Robust, space-saving and flexible

- **Optimised for the food retail sector**

Specifically designed for the requirements of the food retail sector – robust and reliable.

- **Space-saving and efficient**

Thanks to the fold-up base plate, the containers can be nested with ease.

This saves valuable storage space and facilitates handling in daily operation.

- **Versatile options**

Available with two or four side sections, with or without a middle shelf, as well as with a base plate made of plastic or sheet metal – for maximum adaptation to different requirements in warehouse and retail operations.

Dimensions L x W x H

845 x 760 x 1,920 mm

PACKAGE ROLL CONTAINERS

For more flexibility in the parcel and logistics sector

Dimensions L x W x H
1,200 x 1,000 x 1,800 mm

- **Customisable**

Available in various sizes and designs – open or closed, with a basic design made of sheet metal, wire mesh, or a combination of both.

With practical equipment options such as safety net, wire mesh doors, a fixing mechanism and many more.

- **Easy to fold up and nest**

This saves valuable storage space when not in use and facilitates handling in daily operations.

- **Asset tracking (optional)**

Thanks to digital location tracking, you can always keep an eye on your roll containers and identify route deviations at an early stage.

2. **POWER** ON THE MOVE

| When flexibility becomes the standard

In modern logistics, mobility is what matters: If you want to remain flexible, you need solutions that work independently of central infrastructure.

And this is exactly what Wanzl delivers – with products that turn into an office on four wheels.

KT3 ORDER PICKING TROLLEY WITH MOBILE POWER SUPPLY

Order picking with convenience and energy

Dimensions L x W x H
(trade fair sample, without add-on parts)
900 x 625 x 1,630 mm, other sizes available.

- **Powerful energy supply**
With integrated li-ion battery and power strip for connecting peripheral devices.
- **Efficient and time-saving**
All devices are ready for use directly on the trolley – for short distances and a smooth process.
- **Designed for flexible use**
Ideal for digital picking, labelling and any process that requires a mobile electricity supply.

← Power
for printers,
pick-to-light
components
or screens.

MOBILE WORKSTATION

Take your office with you

Dimensions L x W x H

650 x 641 x 1,087 to 1,237 mm (adjustable)

- **Ready to use, any time, any place**

The mobile workstation brings your documents and devices directly to you where you need them – be that in the incoming goods area, stocktaking zone or at ever-changing locations.

- **Ergonomic and adaptable**

The table top is height-adjustable and can be comfortably adapted to different body sizes.

- **With optional mobile power supply**

A powerful li-ion battery reliably powers laptops, printers, scanners and monitors – all without a fixed source of electricity.

3. **SPACE-SAVING** **TRANSPORT HELPERS**

| For efficient processes
in even the most
confined spaces

Narrow aisles, restricted storage space and high dynamics: These are the types of scenarios where our solutions come into their own. With their compact design, high manoeuvrability and clever functions, they ensure smooth workflows and optimal use of space – from internal transport to disposal processes.

U-BOAT CART

Narrow design for effortless manoeuvring in narrow rows of shelves

- **Practical step**
for convenient removal of goods from higher shelving units.
- **Optimised for transporting Euro boxes.**
- **Can be rotated 360° on the spot**
thanks to fixed castors secured in the centre for maximum manoeuvrability.

Dimensions L x W x H

Inner dimensions of loading area:

1,225 x 410 x 1,169 mm

Total height: 1,375 mm

DISPOSAL CONTAINER

FOLDABLE

Collapsible design for minimal storage requirements

Dimensions L x W x H
1,282 x 890 x 1,038 mm

- **Quick-folding for compact storage**
Its innovative folding mechanism allows additional containers to be stored away neatly once peak seasons are over – ideal for operations that need extra capacity during busy periods and want to avoid wasting valuable storage space afterwards.
- **Generous capacity**
With a volume of around 750 litres, it collects cardboard and film waste directly at the point of origin while remaining easy to manoeuvre despite its size.
- **Lifting brackets for baling presses**
Side-mounted brackets enable efficient handling via the lifting-and-tilting systems of horizontal balers, making the emptying process noticeably easier.

WANZL MATERIAL HANDLING

Our production and assembly locations worldwide

Our global presence, with manufacturing facilities in Germany, the Czech Republic, the UK, the USA, Mexico and China, enables us not only to provide our customers with deliveries in bulk, but also, whenever possible, to reduce their costs by assembling locally.
