

I VINO TECH

Wines: best placement – superb presentation

*// WANZL wine displays combine elegant,
space-saving design with a high information
and presentation factor //*

VINO TECH

Wine, presented perfectly

■ **A fine wine** makes everyday life better and is the ultimate highlight for special occasions. Customers always put thought into buying a wine.

They want information that is as specific as possible and, when making their selection in the shop, they would like to be guided quickly and easily to the type of wine that meets their taste and quality requirements.

vino tech fulfils these requirements in the best possible way. The wine display is designed to meet the needs of both the seller and the customer. Versatile in use, yet slim and space-saving, it attracts the attention of the buyer at the POS and combines well thought-out functionality with a sophisticated look in its three-level design.

At the top, wine bottles are placed at a slight angle to ensure easy readability, whilst the wine bottles in the centre are stored horizontally; the lower area provides sufficient space for boxes for the sale of larger quantities.

There are two presentation modules to choose from: vino tech as a wall unit or end cap, and vino tech twin as a free-standing gondola element. ➤

↓ VINO TECH TWIN

Basic unit combined with an add-on unit as a gondola solution

→ VINO TECH SMALL TWIN

Three presentation and stock levels

CAN BE SET UP ANYWHERE AND COMBINED IN ANY WAY

vino tech offers the ideal solution for presenting quality wines according to their special requirements, in an eye-catching yet spatially efficient way. The presentation on the top shelf dominates the primary visual level. Here, the bottles are placed at an angle to ensure that the labels and inscriptions are easier to read. In the individual cells on the middle level, they are clearly arranged and individual bottles are easy to remove. On the lower level, there are boxes of bottles for the sale of large quantities. vino tech is available as a single-sided wall-mounted or double-sided gondola solution and can be extended as desired. Different finish and décor variants enable you to adapt the system to your individual sales areas in the best possible way.

↓ VINO TECH SMALL

// Your benefits – at a glance //

- Space-saving, three-level design
- Wall and gondola displays – can be extended as required
- Various finishes and décors to choose from
- Uncomplicated, fast assembly

↓ VINO TECH

Basic unit with extension unit as a wall display solution, can be extended as required

CONVINCING RIGHT DOWN TO THE LAST DETAIL

Specially selected materials – high-quality workmanship

■ **High quality can always be seen and experienced.**
vino tech not only offers a visually elegant and highly functional presentation solution, but also high quality materials and workmanship. Product design and execution complement each other to create an entirely convincing solution.

↑ WOODEN FRAME FOOT PROTECTOR

↑↑ HEIGHT-ADJUSTABLE feet

↑ VINO TECH WITH GONDOLA DESIGN, Wine presented from both sides

→ **WALL DESIGN**

Enhanced with wooden frame and trim

↓ **GONDOLA DESIGN**

Optimal use of sales area

// As neat as a pin: with vino tech, customers have the fastest possible access to the products they want //

← **PERFECTLY PRESENTED**

Wooden frames allow the attachment of info clipboards to display wine expertise and price

↗ **HORIZONTAL STORAGE** – for fast access

/ OUTSTANDING PLACEMENT

vino tech attracts shoppers

■ vino tech showcases your wine range

in the best possible way. Do you want to highlight specific wines? – Simply place one of the basic vino tech units on one of your existing sales shelves and let customers decide which wine they will choose for which occasion. In the top shelf section they will find the information they need, in the bottom section they can decide whether they want to choose individual bottles, boxes or gift baskets.
