- > **Makes in-store smartphone use convenient**
- > **Can be retrofitted to shopping trolleys**

Theft-resistant retention on the shopping trolley

The SmartFix holder protects smartphones against access by third parties while on shopping trolleys. A two-digit combination lock secures the smartphone firmly in the holder.

For universal use with all standard smartphones (max. dimensions 160 x 78 x 10 mm).

Makes in-store smartphone use convenient

The angled holder makes it easy for customers to use their smartphone while shopping. It can also be used with mobile applications such as self-scanning and mobile payment.

Retrofittable

The SmartFix smartphone holder can be attached to shopping trolleys with a round tube handle as well as the Wanzl Promobox Plus. Can also be retrofitted.

Additional security

If the customer can't remember the code to unlock it, the smartphone holder can be opened by store personnel using a master key.

Designation	Item number
Smart phone holder with Promobox adapter	01.48935.07-0000
