

Genesis cash desk

Modular, flexible solution for the checkout area

Genesis cash desk

■ Due to its enormous sales productivity per square metre, the checkout area is regarded as a high-performance area. From a functional point of view, this area also has a lot to offer and places high demands on the design. As the checkout is often the customer's only contact with the store staff, it can make a particularly positive contribution to the shopping experience.

Wanzl checkouts have a modular structure. This provides a high level of flexibility when it comes to spatial adaptation as well as integration of the latest technical equipment.

Wanzl checkouts boost the efficiency of your employees and, at the same time, are a positive calling card for your store.

- *Modular cash desk for maximum flexibility*
- *Optimally integrated add-ons*
- *Perfect corporate design integration*
- *Quality_MADE BY WANZL*

Genesis cash desk

■ A new take on the checkout area – the modular design approach used in Wanzl checkout areas enables unprecedented levels of flexibility in terms of the operating concept, technology and presentation elements. For more emotion, more impulse buying, more convenience and more efficiency in the most productive area of the store.

1 Convertible body

The robust body of the Genesis cash desk is manufactured to a high standard. Edges and corners are rounded and concealed so that there are no protruding or abutting edges. If anything breaks, parts of the trim can be replaced. Using magnetic foils, the design can be adapted or redesigned for promotional campaigns.

2 Checkout counter belt tailored to your needs

The size of the checkout counter belt depends entirely on your requirements and the spatial conditions, with a minimum 1,800 mm conveyor belt which can be extended in increments of 300 mm. The maintenance-free drive mechanism of the checkout counter belt ensures quiet and stable running.

3 Exemplary workplace ergonomics

Whether seated or standing – all operating and control elements such as the scanner and scale units are within easy reach, integrated in a process-friendly way and easy to operate. Generous storage space is available for work equipment as well as personal belongings.

4 Generous packing recess

The packing recess is completely welded so that no liquids can flow into the desk. Cleaning is quicker and more precise. The technology is safely protected at all times. Divider to separate different customers' purchases in the packing recess.

5 Preparation for cash management systems

All the cash management systems commonly available on the market can be integrated into the Wanzl cash desk and prepared for the equipment.

6 Well-placed bag racks

Easily accessible shelves for storing carrier bags are built into the substructure of the checkout counter belt.

7 Best protection against damage

The protectors protect the desk from scratching by shopping trolleys in particular.

8 CI integration

Our selection of décors and finishes ensures that the cash desks integrate harmoniously into the overall layout.

9 Quick installation

Wanzl checkouts are fully constructed in the factory and then delivered in modules. This means that the checkout area in the store can be installed quickly. Easily accessible cable guides and placeholders enable quick retrofitting of your checkout components.

Checkout area – smart accessories

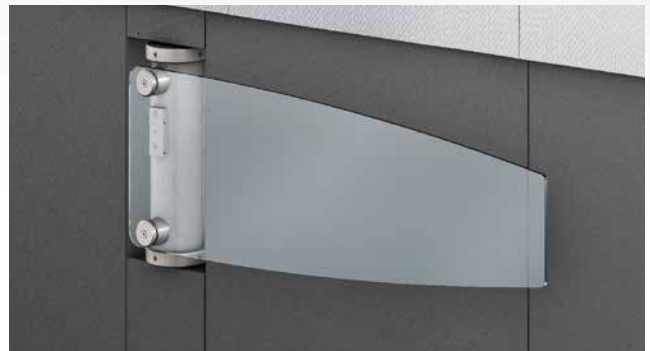

1 Checkout Manager

With the checkout control system, processes in the checkout area can be coordinated reliably. Through targeted deployment of personnel, check-outs are staffed and waiting times for customers are reduced.

2 Checkout barriers

If the checkout is not occupied, checkout barriers prevent customers from leaving the store at this point. Your staff are alerted of any attempts at manipulation by means of an alarm. The motorised m-Gate is a particularly convenient solution, opening and closing the checkout barrier based on the checkout status.

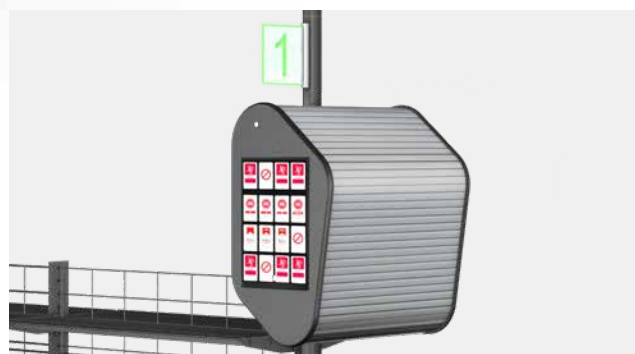

3 Checkout display stand

Access made easy. With its integrated convenience module for drinks and snacks or its classic Smokythek, the optional checkout display stand is always ergonomic, encouraging more impulse buys.

4 OTH cigarette holder

Cigarettes and tobacco products are distributed and sold in a safe and controlled manner using the OTH cigarette holder. The conveyor system can only be operated by checkout staff, reducing losses from theft and ensuring compliance with legal requirements concerning the sale of cigarettes.

Genesis cash desk

Standard equipment

- > Checkout counter belt 3,000 mm with base
 - > Maintenance-free checkout counter belt drive mechanism
 - > Checkout counter belt control system incl. photocell, alternatively operated via foot switch
 - > Track for article separators

 - > Input via keyboard or touchscreen
 - > IT system
 - > Scanner type
 - > Weighing scales type
 - > Cash drawer type
 - > Printer type
 - > Goods security
-

Technical details

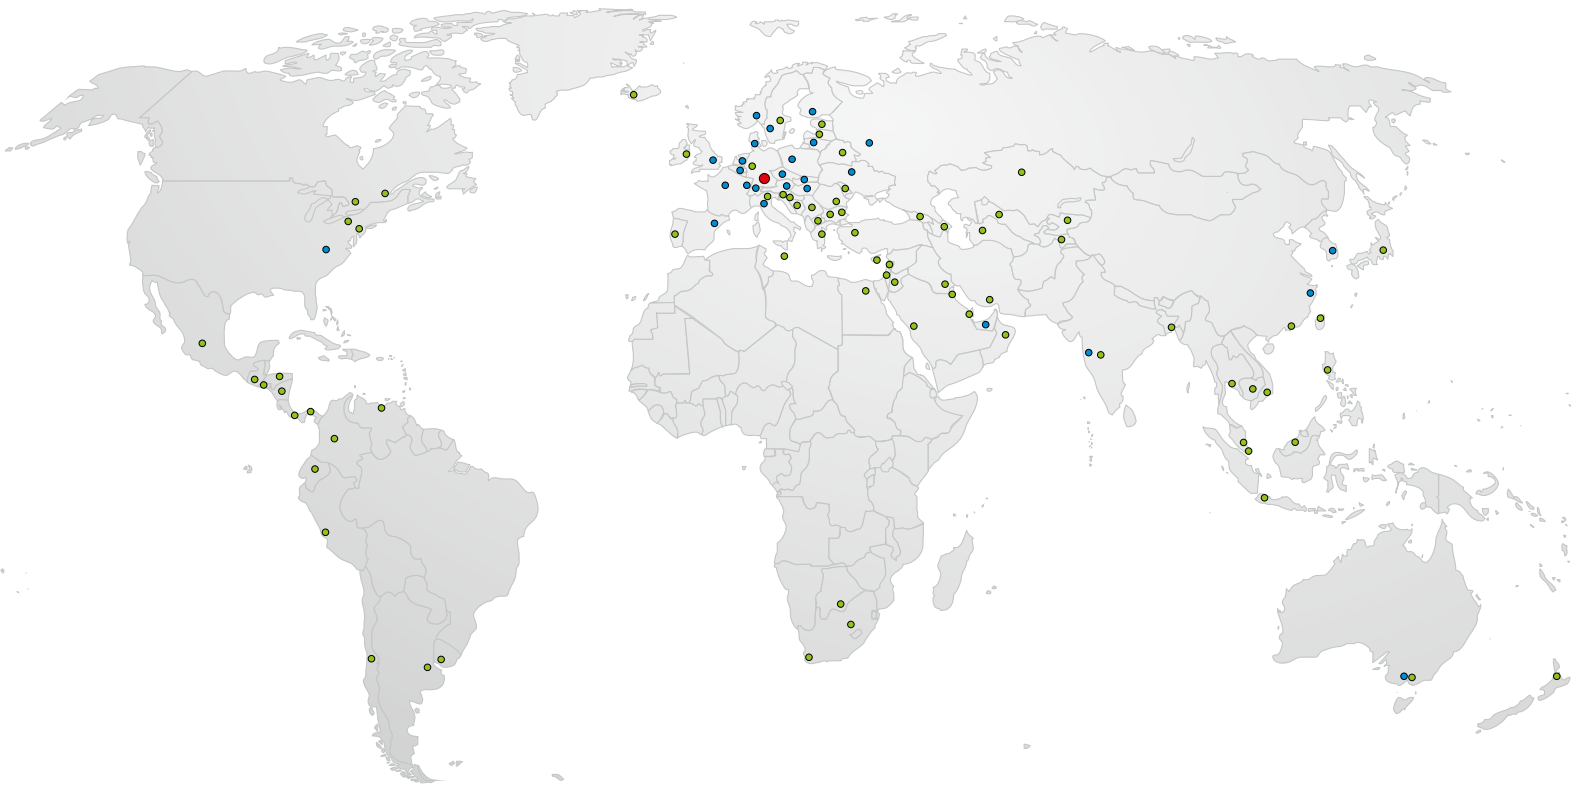

Cash desks – customised solutions

■ Do you have new ideas or additional requirements for your checkout area? We will be pleased to discuss your needs and develop a checkout area perfectly tailored to your requirements. With creative designers, experienced technicians and engineers as well as efficient production facilities, an extensive range of solutions is at your disposal.

In order to achieve your project goals, the development process is reviewed at defined intervals with regard to milestones and the success of the project and discussed with you. This means you are always up to date, the possibility of errors is reduced to a minimum and success can be planned.
