wanzl connect™

Optimize store processes, store operation and staff deployment through device data analytics.

- Cloud-based system to connect and monitor Wanzl devices and provide transparency of store processes
- Manage staff task assignment through notifications sent by Recommendation Tool to store associates or managers
- Know when to collect shopping carts from the parking lot through Cart Storage Monitoring module
- Always have the right number and mix of shopping carts with wanzl connect Cart Counting module
- Tracks gate opening and walk-out events to provide usage insights for Wanzl entrance and exit gates
- Gate status and gate Live Monitoring information accessible on individual gate level or store level
- Automate shop operations with Self-Service module so employees can focus on customers and top-priority tasks
- Directly access or export data through your wanzl connect dashboard via web-application
- Privacy Protection: No customer data is collected
