

## Basic 2 shelving system

Basic 2 is a flexible and functional shop fitting system. The system is easy to handle, has loose feet, can be supplied with different back panel solutions and consist of basic modules in 60 or 90 cm for wall or floor as well as wall uprights for presentation of lightweight items. The numerous possibilities of combination make the system to fit virtually all sectors. Basic 2 is made of steel that is a eco-friendly material.

The Basic 2 system offers numerous possibilities of combination and can be build single-sided or double-sided units that stand on their own feet or can be wall-mounted without legs and backgrounds.
