

# Wanzi 3D People Counter

Assists staff in controlling the number of persons in the store

# Wanzl 3D People Counter

*Assists staff in controlling the number of persons in the store*

- > *Minimises the risk of infection by controlling the number of persons*
- > *Meets data privacy requirements*
- > *High-quality components for further use in wanzl connect®*

In order to minimise the risk of infection, the number of customers who may be in the store at any one time is limited in certain stores. Our video-based customer counting system with maximum counting accuracy provides precise data for this purpose. A screen at the entrance area informs customers whether access is currently possible.

If the maximum permitted number of people is in the store, this information is provided visually and, as an option, also acoustically. The maximum number of people per square metre of sales floor area can be set.

The maximum permitted number of persons in the store has not been reached – access is **granted**

The maximum permitted number of persons in the store has been reached – access is **not granted**

**STEREOSCOPIC CAMERA**  
for reliable counting at entrances and exits.

**THE DATA PRIVACY REQUIREMENTS**  
of ePrivacyseal GmbH are met in an exemplary way.

Components – Basic package incl. monitor	Item number
1 x stereoscopic camera	23.03672.95-0000
Minicomputer	
Monitor	
Cabling	
Network switch	
Software license (one-time)	
<b>Optional</b>	
Additional stereoscopic camera incl. cabling	23.50667.95-9016
Screen floor mount: base with monitor bracket	23.08644.73-9005
